

## **Ouverture**

### **opening**

thanks to a telescopic system Ouverture can be closed and opened by one hand only

### **gliders**

cylindrical shape, anti-slip, made of injected polypropylene

### **structure**

the structure is fully weld free. The legs are made of high resistance 'Asform' steel of diameter 18 mm. and thickness 1,8 mm. available with aluminium paint or chromed finishes. The telescopic tubes are in aluminium.

### **joints**

six die-cast joints or six polyamide joints with stainless steel bolts keep the structure together

### **seat and back**

the seat and back are available in three different materials: polypropylene with anti-slip finish in black, blue, dark grey, light grey and ivory colour multilayer beech wood available in natural and cherry wood colours transparent Plexiglas®

### **back**

all versions have a 30° rotative back to support a person when sitting. The polypropylene version has a 360° rotative back that can be put in the original position by a snap
